Patent and Trademark Office O-326 (Rev. 04-01) Office Action	on Summary	Part of Paper No. 5

Application/Control Number: 09/939,422

Art Unit: 2873

DETAILED ACTION

I. Claims 1-45, 56-75 and 81-84 drawn to a MEMs device, classified in class 359, subclass 872.

II. Claims 46-55 and 76-80, drawn to a method of fabrication for MEMs devices, classified in class 438, subclass 8.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as DRIE etching, wet etching or micromachining.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Application/Control Number: 09/939,422

Art Unit: 2873
